Introduction

Web Intelligence is a suite of proprietary SaaS (Software as a Service) solutions for managing in-depth investigations on the Internet and specifically for the timely detection and removal of intellectual and industrial property violations on the clear and deep web.

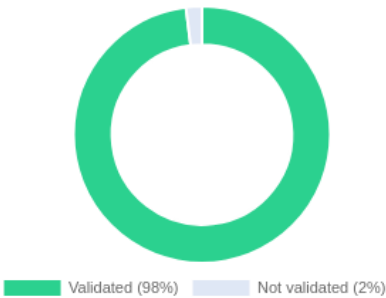

We present below the results of the automatic search of "Matrix" carried out on date 2025-03-27. The search was last updated on date 2025-03-28. The search led to the identification of 3780 results.

Relevance is a proprietary indicator, based on the Similar Web rank, that provides an at-a-glance understanding of the relevance of a given domain. This indicator was created to focus investigative activities on domains that are likely in the most damage risk rather than those with the highest number of results.
